- Beaver Control with Trapping Demonstration
- Aquatic Weed Identification
- Aquatic Weed Control Methods
- Pond Water Testing for Alkalinity

Guest Speaker-Dusty Allen,
Wildlife Damage Management Technician
with Texas Wildlife Services

At the conclusion of the trapping demonstration we will be glad to look at any pond weed samples that you bring in a bucket of water to help identify and give control recommendations. In addition to this it is paramount to understand the health of your pond for it to be as productive as it can be. We will collect water samples to be taken back to our offices where we can test the alkalinity of the water. This service will be free of charge. Make plans to attend now. It will be hot, and we will be outside so bring plenty of water, apply sunscreen and be prepared to sweat.

The members of Texas A&M AgriLife will provide equal opportunities in programs and activities, education, and employment to all persons regardless of race, color, sex, religion, national origin, age, disability, genetic information, veteran status, sexual orientation, gender identity, or any other classification protected by federal, state, or local law and will strive to achieve full and equal employment opportunity throughout Texas A&M AgriLife.
